Net Metering & Interconnection Agreement

Name(s) _____ Account _____

Billing Address _____

Physical Address / Location _____

Primary & Alternate telephone numbers _____

I request to be placed on Net Metering. By signing this agreement, I certify that my renewable system has been:

1. Installed in compliance with IEEE standards for Utility Interface of Photovoltaic (PV) and/or Wind Generating Systems
2. Installed in compliance with the latest edition of the National Electric Code
3. The Photovoltaic and/or Wind Generating System components are Listed and Tested to UL Standard 1741
4. The Photovoltaic and/or Wind Generating System is connected to the DVEC grid
5. The Photovoltaic and/or Wind Generating System meets the public regulatory commission's definition of a Net Metering Facility for the state in which the system is installed

I understand and agree to the following:

1. As the owner of the equipment, I am fully responsible for the unit's operation and safety.
2. As the owner of the equipment, I am fully responsible for costs associated with maintenance and repairs of the system.
3. I am solely responsible for ensuring that these qualifications are met and maintained for the life of my electric generating system and I am responsible for any consequences if they are not met. I understand they are needed for safe operation of my and DVEC's electrical system.
4. I will receive kWh credit to be used in future months for kWh generated that exceed my usage.
5. Once per year my account will be "trued up" and I will receive either a check or billing credit for any excess kWh produced for that year. DVEC will purchase at the avoided cost, the remaining kWh carry over. The true up month will be the end of the December billing period and any credit will be applied to my account on January's bill.
